### Sustainable and economic lighting

At Tedisel, we specialize in optimizing patient-centered workspaces to ensure maximum performance of hospital equipment.

This time, we have gone beyond optimization and put the patient at the center of our innovation. Introducing our AURA LIGHT LED light unit, your solution to create a welcoming and healing environment in any room, such as inpatient and intensive care rooms in your hospital.

## INNOVATION AND COMMITMENT FROM BARCELONA TO THE WORLD

**From Barcelona, the epicenter of our company's location, the most advanced HOSPITALIZATION solutions for private and public hospitals are manufactured and exported all over the world.**

Equipped with the most advanced wall-mounted solutions and backed by strategic partnerships with competent suppliers, we are ready to adapt with agility to your specific project needs.

Meticulous choice of high-quality components guarantees optimal durability and availability, backed by easy maintenance to ensure exceptional performance in your hospital.

At Tedisel Medical, we combine our strong technical expertise with a firm commitment to the future of healthcare and environmental sustainability.

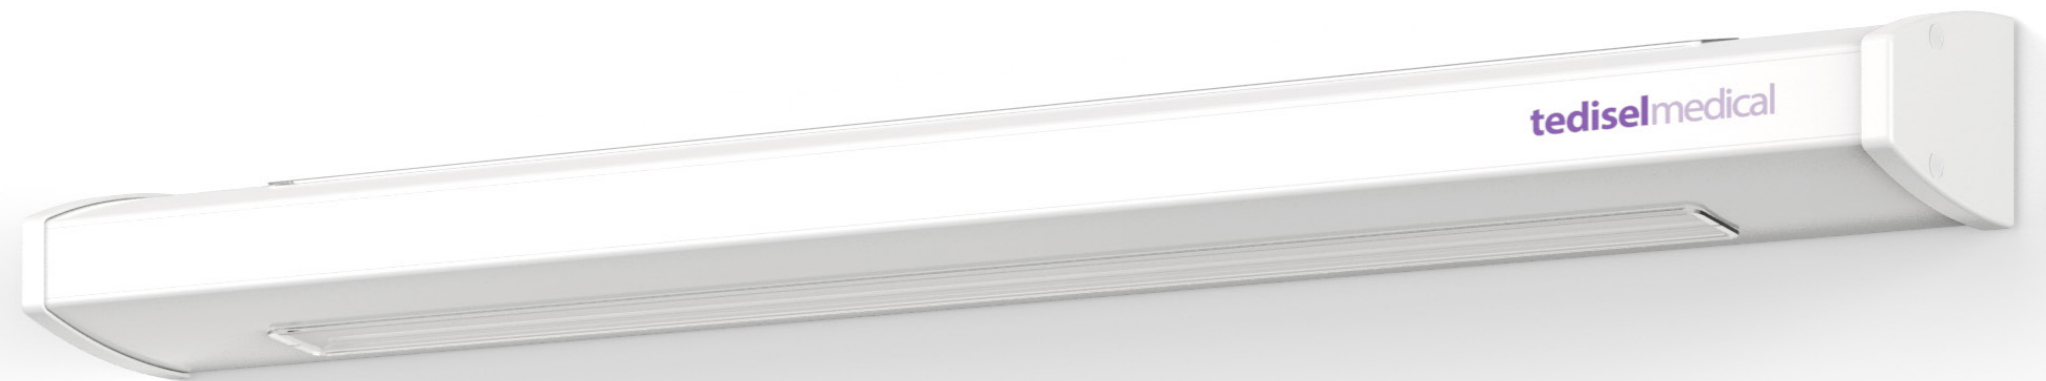

## CREATING A HEALING AND SUPPORTIVE PATIENT EXPERIENCE

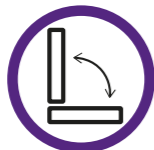

### STARTS WITH YOUR VISION AND OUR DESIGN STRATEGY TO SOLVE CHALLENGES

At Tedisel Medical, we understand the importance of creating environments that promote healing, transforming patient rooms into recovery spaces with a healing environment.

That's why we have invested in the development of our AURA LIGHT fixture, an add-on designed specifically for healthcare facilities. This modern wall-mounted lighting solution provides sustainable and cost-effective illumination, thanks to its state-of-the-art technology.

Surface Mounted

Horizontal or Vertical orientation

Compact model

LED lighting  
(Direct, Indirect Light)

Tedisel Medical has opted for AURA LIGHT, a vertical or horizontal solution adaptable to any project. It is an **LED light unit designed to combine architectural aesthetics with exceptional lighting performance to improve patient comfort and maximize clinical performance.**

AURA LIGHT LED Light offers a sleek design that meets the needs of both patient and caregiver. When placed at the bed head unit above the patient's bed, the over-bed light provides high-level illumination and light distribution that allows caregivers to perform thorough examinations with ease, while additional reading and ambience features enhance patient comfort and well-being.

**FROM YOUR VISION TO OUR DESIGN:  
OVERCOMING CHALLENGES FOR  
OPTIMAL RESULTS**

**Commitment to the well-being of patients**

Complement our bed head units and patient bedside with our AURA LIGHT LED light fixture, a contemporary and functional minimalist design. Always with infection control in mind, this fixture is designed with seamless surfaces and clean edges.

**ENHANCE WITH COMPREHENSIVE SERVICES  
TO ENSURE STAFF SATISFACTION AND  
PATIENT RECOVERY**

**We cultivate long-lasting and positive relationships with our partners and costumers**

AURA LIGHT, to provide the patient with an optimal healing environment while maximizing clinical efficacy with adequate light output and glare-free illumination.

# Technology, product design and hygiene

The essentials for any hospital

**AURA LIGHT**, our bedside LED light unit, available in vertical or horizontal format, is the perfect complement that brings together hospital engineering, efficiency and functionality. It integrates systems with clinical protocols to avoid accidental contamination, providing optimal lighting in various rooms of your hospital.

At Tedisel Medical, we guarantee that all our products are designed to facilitate cleaning and prevent infection.

## PATIENT SUPPORTIVE ENVIRONMENT

### We listen, we connect, we provide solutions

Hospitalization can be extremely stressful for patients, and this stress can negatively impact their treatment. Studies have shown that proper design of the hospital environment can significantly reduce stress, pain and anxiety. By incorporating hospital-specific equipment, such as our AURA LIGHT with multi-directional light configurations, we can provide the right lighting for the hospital environment.

## MULTIPLE DIRECTIONAL LIGHT CONFIGURATIONS

### WORKPLACE CUSTOMIZATION

When equipped and transforming your hospital with our bed head units, it is essential to integrate our AURA LIGHT in areas such as hospitalization, resuscitation, critical care, maternity, ICU and pediatrics. This luminaire transforms and enhances the environment with a sustainable, soft light that contributes significantly to patient recovery.
